Skills

Programming languages	Javascript, Typescript, C#
Frameworks	ReactJS, NextJS, ASP .NET Core
DBMS and Tools	SQL Server, MySQL, MongoDB, Git, Postman, Figma, Firebase
Soft skills	Research, Self-learning, Problem-solving, Teamwork
Foreign languages	English - Fluent (IELTS 7.0)

Experience

Front-end Developer Intern September 2021 - December 2021

FPT Software

- Contributed to the development of a secure web application within a 25-person Agile team.
- Used JavaScript, jQuery, and Kendo UI to build a user-friendly interface. Integrated 2 databases into the project with the Java Spring framework.
- Designed and developed APIs within services to provide data access for the front-end application.
- Intensive testing during late-stage development to assist in finding crucial bugs and ability to deliver instantly effective solutions under pressure.

Projects

OJT Management System May 2023 - October 2023

- Description: this is an internal management system to manage employees participating in on-the-job training program (who are students coming from affiliated universities with the company).
- Team size: 4 - Project development methodology: Agile.
- Technologies: C# ASP.NET Core, WebHook, ReactJS, Redux, Firebase.
- Responsibilities: Designed and implemented core features including user authentication and authorization, developed RESTful APIs to manage training programs and employee data, and integrated Firebase for storage and notification.
- GitHub: [FE](#) - [BE](#) - [Document](#)

Grocery Store Management System May 2021 - September 2021

- Description: This web application helps the store owners of small-to-medium-sized grocery stores to deal with some problems such as inventory loss, overwhelming paperwork for inventory management, purchase order or miscalculation.
- Team size: 6 - Project development methodology: Agile.
- Technologies: C# ASP.NET Core, Firebase, Docker, TypeScript, ReactJS, Redux
- Responsibilities: Primarily focused on front-end development, implemented user interface components using ReactJS and TypeScript, performed extensive testing to ensure functionality and usability, collaborated with backend developers to integrate APIs, optimized performance and usability.
